ABOUT US

Dimple Pneumatics is a trustworthy & reliable name in Reciprocating Air Compressors since 1975 & in 2017 we starts Manufacturing Screw Compressors offering a comprehensive range of 10hp to 100hp Compressors which have un matched quality. our Group is utilizing our technology and experience in giving high quality products to our clients by our Compressors and their spares. We design & deliver tailor made Compressors as per the customer requirements & that to at cost effective rates.

OUR MISSION & VISION

Dimple Pneumatics is a trustworthy & reliable name in Air & Screw, Our mission is to fulfill our customers all the time by providing on time zero defect high quality Compressor & it's parts. Continuous improvement & innovation in all areas is our priority for maintaining Company standards, product performance with our competitive cost. We have core strength to perform better & better to beat our past performance records.

Screw Compressor

30% Energy Saver

Benefits

- Outstanding resistance to deposits formation ensures improved air compressor.
- Efficiency and hence longer running periods and reduced maintenance costs.
- Excellent demulsibility ensures smooth functioning of oil separator element.
- Exceptional overall protection against corrosion, rusting, wear.
- Excellent oxidation and thermal stability hence longer oil drain interval.

Refrigerated Air Dryer

Quality & Technology

With in depth Technology and design on International Standards.

Manufacturing

The Manufacturing system of Dimple Pneumatics is with In house Facilities one of the best in India.

Customer Care

Dimple Pneumatics offers quick & prompt Customer care solutions & easy availability of spare parts.

LOW PRESSURE LOSS & ENERGY SAVING, ECOFRIENDLY REFRIGERANT APPLIED, EASY IN INSTALLATION AND MAINTENANCE, STABLE PERFORMANCE, LONG LIFETIME

Air Receiver

DIMPLE AIR COMPRESSORS ARE THE LEADING SUPPLIER OF AIR RECEIVER TANKS. AIR RECEIVER TANKS AVAILABLE WITH US IS AN EXCLUSIVE RANGE OF VERTICAL AIR RECEIVER THAT ARE EXTREMELY EFFECTIVE IN CONDENSING THE MOISTURE AND OTHER IMPURITIES IN THE COMPRESSED AIR. ONCE THIS IS DONE, THE AIR PASSED THROUGH OTHER PROCESSORS FOR FURTHER PROCESSING. AIR RECEIVER TANKS ARE DESIGNED TO PROVIDE A SUPPLY BUFFER TO MEET SHORT-TERM DEMANDS THAT CAN EXCEED THE COMPRESSOR CAPACITY. THEY ALSO SERVE TO DAMPEN COMPRESSOR PULSATIONS, SEPARATE OUT PARTICLES AND LIQUIDS, AND MAKE THE COMPRESSED AIR RECEIVER SYSTEM EASIER TO CONTROL. IN PRINCIPAL TWO DIFFERENT AIR RECEIVERS ARE IN A COMPRESSED AIR SYSTEM:
